

DAVID LYONS

Front-End Web Developer, Design Engineer, Interactive 3D Web Graphics · Los Angeles, CA

Portfolio: <https://davidlyons.dev> · **Email:** david@davidlyons.dev · **Phone:** 214-538-3002

SOFTWARE & SKILLS

JavaScript, TypeScript
CSS, SCSS, Tailwind
HTML
React
Zustand
Shadcn
Bootstrap
Visual Studio Code
Command Line

Storybook
Responsive Web Design
Git, GitHub, CI/CD
Node.js
npm, pnpm
Next.js
Astro
Vite, Webpack
Chrome DevTools

Three.js
React Three Fiber
Blender, ZBrush
3D Modeling
Illustrator, SVG
Photoshop, Affinity
Premiere, DaVinci Resolve
GraphQL, REST APIs
Docker

Photo & Video Editing
Accessibility
macOS, Windows, Linux

Currently learning:
Testing Frameworks
Backend
Shaders

WORK EXPERIENCE

Front-End / 3D Web Developer

Freelance, Los Angeles, CA · Remote, September 2025 - Present

- Built 3D product configurator app: modeled guitar assets, designed and developed layout, color and geometry selection controls, instantiated duplicate geometries and repositioned shared parts to reduce file sizes and load times. (Blender, React Three Fiber, glTF, TypeScript, Tailwind, Shadcn, Zustand)
- Upskilling in backend and automated testing frameworks. (PostgreSQL, WebSockets, Docker, AWS, Vitest)

Senior Design Engineer

BP (Energy), Los Angeles, CA · Remote, May 2020 - August 2025

- To address inaccessible web interfaces and fragmented frontend tech stacks: worked alongside team of UX designers to translate a global, atomic design system from Figma into a reusable component library (React, TypeScript), provided examples and documentation in Storybook, styled Recharts data visualizations, and published GitHub package that enabled external dev teams to move faster and more consistently with improved UX and unified UI across the company.
- Developed responsive website redesign for BP Pulse EV charging, improved accessibility and reduced monthly CMS cost. (Next.js, Contentful, GraphQL, Node.js)

Front-End / 3D Web Developer

Object Edge (Agency) · Contract, Los Angeles, CA · Remote, February 2019 - January 2020

- To showcase Motorola APX Next radio using high-fidelity 3D web model: developed interactive 3D landing page sections, optimized geometry, UVs and textures to compress file size, implemented lights, camera rig, preloader and animation, and delivered fast load times and responsive UI recognized as a Finalist in Fast Company's 2020 Innovation by Design Awards in the User Experience category. (Three.js, Tween.js, HTML, SCSS, JavaScript)

Software Engineer

WITHIN (Virtual Reality), Los Angeles, CA, November 2015 - August 2018

- Front end engineering on 360 video WebVR platform and interactive WebVR music experience.
- Designed and implemented 2D and 3D user interfaces. (HTML, SCSS, JavaScript, Three.js, Tween.js)
- Added support for VR headsets and controllers and tested in all supported web browsers. (WebVR API, Gamepad API)
- Implemented UI sound effects. (Web Audio API)

Front-End Web Developer

Slingshot (Ad Agency), Dallas, TX, March 2013 - November 2015

- Front end development on Borden Dairy's 2014 responsive website. (HTML, SCSS, JavaScript)
- Collaborated with teams of project managers, UX, creatives, back-end developers and quality control.
- Presented an Intro to WebGL with Three.js at a front end web developer conference in 2014.
- Clients included Texas Motor Speedway, Sabre Airline Solutions, Dallas Symphony Orchestra, Legacy Texas Bank, Associa and American Home Shield.

Front-End Web Developer

TRG / Click Here Labs (Ad Agency), Dallas, TX, March 2012 - March 2013

- Lead front end development on Chuck E. Cheese's 2012 responsive website. (HTML, CSS, JavaScript)
- Collaborated with teams of project managers, UX, creatives, back-end developers and quality control.
- Clients included Central Market, Corner Bakery, Advance Auto Parts, T.G.I. Friday's, TXU Energy, The Home Depot and Go RVing.

EDUCATION

Master.dev, Front-End and Fullstack Learning Paths, 2019 - Present

Texas A&M University, College Station, TX, Fall 2007 - Fall 2010

Bachelor of Science in Visualization, December 2010

- Courses included 3D graphics, modeling, animation pipelines, graphic design, motion graphics, computer science, video editing, drawing and painting. (Maya, Photoshop, Illustrator, After Effects, Premiere)
- Designed, developed and maintained websites for two on-campus student organizations. (HTML, CSS)
