DAVID LYONS

Web Developer, Design Engineer, Interactive 3D Web Graphics

Portfolio: https://davidlyons.dev · **Email:** david@davidlyons.dev · **Phone:** 214-538-3002

SOFTWARE & SKILLS

JavaScript, TypeScript	Storybook	Three.js	Photo & Video Editing
CSS, SCSS, Tailwind	Responsive Web Design	React Three Fiber	Accessibility
HTML	Git, GitHub, CI/CD	Blender, ZBrush	macOS, Windows, Linux
React	Node.js	3D Modeling	
Zustand	npm, pnpm	Illustrator, SVG	**Currently learning:**
Shadcn	Next.js	Photoshop, Affinity	Testing Frameworks
Bootstrap	Astro	Premiere, DaVinci Resolve	Backend
Visual Studio Code	Vite, Webpack	GraphQL, REST APIs	Shaders
Command Line	Chrome DevTools	Docker	

WORK EXPERIENCE

Front-End / 3D Web Developer

Freelance, Los Angeles, CA · Remote, September 2025 - Present

- Built 3D product configurator app: modeled guitar assets, designed and developed UI, color and geometry selection controls, instanced duplicate geometries and repositioned shared parts to minimize file sizes and load times. (Blender, React Three Fiber, glTF, TypeScript, Tailwind, Shadcn, Zustand)
- Upskilling in backend, AI and automated testing frameworks. (PostgresQL, WebSockets, Docker, AWS, Vitest)

Senior Design Engineer

BP (Energy), Los Angeles, CA · Remote, May 2020 - August 2025

- Collaborated with team of UX designers to translate a large, global, atomic, enterprise design system from Figma into a reusable component library (React, TypeScript, SCSS), provided examples and documentation in Storybook, styled Recharts data visualizations, and published GitHub package that enabled external dev teams to move faster and more consistently with improved UX, accessibility and unified UI across company applications and websites.
- Developed responsive website redesign for BP Pulse EV charging, improved accessibility, and simplified headless CMS content model to reduce monthly cost. (Next.js, Contentful, GraphQL, SCSS, Node.js)

Front-End / 3D Web Developer

Object Edge (Agency) · Contract, Los Angeles, CA · Remote, February 2019 - January 2020

- To showcase Motorola APX Next radio using high-fidelity 3D web model: developed interactive 3D landing page sections, cleaned and compressed geometry to minimize file size, applied UVs and textures, implemented lights, camera rig, preloader and animation, and delivered fast load times and responsive UI recognized as a Finalist in Fast Company's 2020 Innovation by Design Awards in the User Experience category. (Three.js, Tween.js, HTML, SCSS, JavaScript)

Software Engineer

WITHIN (Virtual Reality), Los Angeles, CA, November 2015 - August 2018

- Designed and implemented 2D and 3D user interfaces and UI sound effects on 360 video WebVR platform. (HTML, SCSS, JavaScript, Three.js, Tween.js, Web Audio API)
- Added support for VR headsets and controllers and tested in all supported web browsers. (WebVR API, Gamepad API)

Front-End Web Developer

Slingshot (Ad Agency), Dallas, TX, March 2013 - November 2015

- Front end development on Borden Dairy's 2014 responsive website. (HTML, SCSS, JavaScript)
- Collaborated with teams of project managers, UX, creatives, back-end developers and quality control.
- Presented an Intro to WebGL with Three.js at a front end web developer conference in 2014.
- Clients included Texas Motor Speedway, Sabre Airline Solutions, Dallas Symphony Orchestra, Legacy Texas Bank, Associa and American Home Shield.

Front-End Web Developer

TRG / Click Here Labs (Ad Agency), Dallas, TX, March 2012 - March 2013

- Lead front end development on Chuck E. Cheese's 2012 responsive website. (HTML, CSS, JavaScript)
- Collaborated with teams of project managers, UX, creatives, back-end developers and quality control.
- Clients included Central Market, Corner Bakery, Advance Auto Parts, T.G.I. Friday's, TXU Energy, The Home Depot and Go RVing.

EDUCATION

https://master.dev, Front-End and Fullstack Learning Paths, 2019 - Present

Texas A&M University, College Station, TX, Fall 2007 - Fall 2010
Bachelor of Science in Visualization, December 2010

- Courses included 3D graphics, modeling, animation pipelines, graphic design, motion graphics, computer science, video editing, traditional art, drawing and painting. (Maya, Photoshop, Illustrator, After Effects, Premiere)
- Designed, developed and maintained websites for two on-campus student organizations. (HTML, CSS)
